

ABOUT US

Since 2008 Seamgen has been designing and building custom software solutions for the desktop, web, and mobile platforms. Located in downtown San Diego, our team of user experience experts and software engineers have delivered digital solutions to user problems across a range of industries from healthcare to finance to communications. We have experience with regulated software and standards-compliance. We take great pride in delighting our customers.

CORE COMPETENCIES

Seamgen is a digital transformation company headquartered in San Diego, CA, specializing in full-stack custom application development services for web and mobile across all cloud platforms (AWS, Azure, GCP). Our proven approach to custom app design and development guarantees we deliver digital products that align with your business goals. Our senior team of designers and developers will modernize your technical architecture, help you migrate, reimagine your user experience, and extend capabilities that create IT efficiencies to accelerate business growth.

DIFFERENTIATORS

- Our unique Hybrid Agile process allows us to provide deep definition of products through design and prototyping, instead of iterating during costly development efforts.
- We are dedicated to be your long term, trusted partner, take pride in understanding all aspects of your business, and create personalized solutions specific to your requirements and internal workflows.
- Our user-centric design philosophy ensures the right features get built, and that users will be delighted with the end product.
- We've been using public and private clouds since their inception, so we're experts at designing for the cloud, building for the cloud, crafting hybrid solutions, and migrating to the cloud.
- We've delivered numerous mobile applications using a range of technologies from pure native to cross-platform solutions with React Native, Flutter and Maui.
